

Style 38 and 138 Couplings

For cast-iron pipe sizes

Dresser Style 38 Couplings are also available for cast iron sizes 2" through 72". These couplings have long been used for joining plain end cast-iron pipe, combining the advantages of absolutely tight joints and easier, faster pipe joining. Style 38 couplings also permit the salvage and use of random lengths of cast-iron pipe from which bell-ends or cracked sections have been removed.

Dresser Style 138 Couplings for Cast Iron Pipe Sizes

Now you can stock one coupling in each nominal size, 2" through 16", and be sure of a fit, whether the cast-iron pipe was made in 1890 or from your latest shipment. The unique feature of this product is one middle ring can be used with up to six different gaskets and three followers to cover a wide range of pipes.

NOTE: These couplings utilize the same materials of construction as the Style 38 as shown on Page 2.

STYLE 38 COUPLINGS

Sizes and Specifications for Plain-End Cast-Iron Pipe

Nominal Size (CIP)	Outside Diameter Inches	Middle Ring Thickness & Length (A&B)	Bolts No./Diam. & Length (D&E)	Gaskets Sec. Dim. Thks/Lgth. (F&G)	Overall Dimensions		Max. Working Pressure Lbs. per Sq. In.	Approx. Shipping Weight (Lbs.)
